

HOARDINGS AND GANTRIES

OVERHEAD PROTECTION PORTABLE BUILDINGS SYSTEM DESIGNED FOR BUILDING AND CONSTRUCTION INDUSTRIES

With pedestrian safety around building sites a key issue, solid and safe overhead protection is essential. Royal Wolf's 'B' Class Container Hoardings and Gantries provide effective 10kPa rated protection for pedestrians and workers from construction materials, debris and other falling objects.

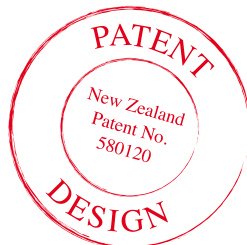

As a totally integrated modular unit with floor, walls and roof all connected you can be guaranteed an extremely impact resistant structure. Royal Wolf's 'B' Class Container Hoardings and Gantries satisfy relevant Codes of Practice and offer substantial benefits over traditional Hoardings and Gantries.

Benefits of 'B' Class Container Hoardings and Gantries

- Superior pedestrian protection
- Effective space utilisation and rapid installation
- Exceptional presentation and superior stability
- Impressive vehicular impact resistance
- Single certification process
- Slip resistant flooring
- Removable floor option for service point access
- Direct connection to buildings without the need for costly stacking frames
- Competitive pricing structure

Components of 'B' Class Container Hoardings and Gantries

- Hoarding and Gantries modules available in 10, 20 and 40ft lengths with interior lighting
